

2011 Annual Scientific Meeting of the College of Radiology

Date: 8-10 April 2011

Venue: Legend Hotel, Kuala Lumpur.

Theme: Beyond Image Interpretation.

This 2011 ASM is organised in collaboration with the Ministry of Health, Malaysia, the Radiological Society of North America (RSNA), University Putra Malaysia (UPM), the Malaysian Oncological Society, Australasian Society for Ultrasound in Medicine (ASUM) and Vision College.

Best Contact (M) Sdn. Bhd participates in this event as exhibitor and sent in Hitachi high-end digital color ultrasound system, AVIUS. We glad to receive positive feedbacks from radiologists on the excellent image quality, efficient & producible result of elastography, which is Hitachi's pioneer, and ergonomic design of AVIUS.

In addition, we proudly introduce Hitachi Superconductive Open MRI, OASIS™ to audience.

OASIS™ provides both open architecture for patient safety and anxiety and also the high-field strength, which provides quality that exceeded radiologist's expectations.
